Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-10 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The claims are directed to a patent ineligible process as the steps involving the computer system are directed to insignificant steps of data gathering and data outputting.

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In the claims, a check file and a web file are indefinite in scope. Also, it is not clear what algorithm is performed by the computer (if any) in the comparing steps.

Claim Rejections - 35 USC § 103

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Positive Pay in view of Saliba (both of record).

The references are each of record. The applicant respectfully traverse the assertion that Saliba qualifies as prior art. Saliba relies on a filing date of a parent application filed on April 21, 2000. The presently pending application has a priority date of March 17, 2000 and thus is prior art to Saliba. Accordingly, Saliba fails to qualify as prior art and Applicant respectfully requests its removal as a reference. The examiner takes official notice that the section relied upon in the reference is of summary format of that state of the art of banking prior to the filing date of the instant application. As to the general argument that Saliba does not teach or disclose a method in a check exception item notification system. The examiner maintains that the check file and web file can read in a single check image or file. (A 112nd rejection has been issued for both limitations as the applicant seems to be reading additional limitations these files
